Simplify real estate management with a comprehensive, enterprise-level Real Estate Management Solution

Real Estate Management is a comprehensive enterprise level property management solution that is built on the Microsoft Dynamics 365 Finance and Operations platform to deliver state of the art digitalised real estate management.

Powered by Dynamics 365 Finance and Supply Chain

Automate and modernise global operations with an intuitive solution powered by Dynamics 365 Finance and Supply Chain from Microsoft. Monitor performance in real-time, predict future outcomes and make data-driven decisions to enable future growth.

About Real Estate Management

Real Estate Management is a comprehensive enterprise level property management solution that is built on the Microsoft Dynamics 365 Finance and Supply Chain platform to deliver state of the art digitalised real estate management.

What we offer

Buildings floors and units are defined in the system in a visual hieratic structure from which they can be easily managed. Spatial Planning and the installation of equipment and meters is also catered for in the solution.

Create and manage Real Estate lease contracts with multiple billing lines from security deposits to rental by square or at a fixed rate, or any other services and fees that make up the rental contract with tenants.

The solution allows users to define and install building equipment directly into the property structures. This means maintenance requests, planned maintenance tasks and even ad hoc repairs can be managed directly from the property record.

Whether the firm is the landlord, or managing the property on behalf of others, the solution has functionality that manages and tracks service provided to specific properties including: site, safety and compliance inspections.

Real Estate Management Can Be Used For

- **360 degree view of properties and building assets:** Property Managers have a centralised Record on not just buildings and spaces, but also of building equipment installed in those buildings.
- **Accurate Billing on contracts:** Property Portfolio managers can use the power of the lease contract billing engine to accurately invoice and receive rent and payment for other services.
- **Plan and Manage Maintenance:** Maintenance managers can plan and schedule maintenance tasks using predefined templates. This includes management of tasks and teams , giving them full visibility on operations.
- **Provide Facility Services:** Facility Managers can record and monitor services requests from tenants and manage their staff and teams in delivering those services timeously.

Why Fusion: The Apps People

Fusion: The Apps People is a premier independent software vendor (ISV) that offers industry-specific applications. Our ever-growing portfolio includes applications that are designed and developed to extend Microsoft Business Applications or, in certain cases, as stand-alone applications to meet specific business requirements. These applications transform operations, empower employees and intelligently engage customers and are designed to meet the needs of customers, Microsoft Business Applications partners and industry experts.
