

A Comprehensive Student Administration System

Enhance the student experience from admissions to alumni

Influenced by easy, intuitive digital experiences in other parts of their lives, today's students and educational stakeholders have heightened expectations from education institutions. With this in mind students, faculty and institutional administrators are looking for innovative solutions that streamlines repetitive processes, provides insights to applicants and enhances the overall student experience.

EDU 365 is a comprehensive, student administration solution that is built on the Microsoft Dynamics 365 platform to deliver end-to-end lifecycle of a student from admissions through to graduation and alumni management.

Powered by Dynamics 365 Customer Engagement

Dynamics 365 Customer Engagement from Microsoft, is a leading cloud-based customer relationship management business solution that can help you manage relationships and interactions with the various stakeholders in the student journey. Improve the value of your student relationships through activity management, social insights and business intelligence.

About EDU 365

EDU 365 is a comprehensive, holistic student administration solution that is built on the Microsoft Dynamics 365 platform to deliver end-to-end lifecycle of a student from admissions through to graduation and alumni management.

What we offer

The solution offers a modern platform across multiple communication channels to manage the recruitment of new students. This includes social media, instant messaging and more traditional channels that are optimised with the use of Artificial Intelligence.

Manage the student application process through to admissions and registration, with an intuitive and innovative solution that is designed to manage complete processes.

Using a hierarchical structure, the solution allows institutions to define curriculum structures including Qualifications, Programmes and Modules. When and where these courses are offered is defined on the record, so that student classes and number on each course is managed.

Manage the relationships and communication with other stakeholders across the institution including, faculty, donors, parents, admin staff and other related parties. The solution keeps and maintains a full communication history record, so you have visibility.

How EDU365 can help your institution...

- **Student Recruitment:** The solution gives recruitment officers the dynamics tools they need to effectively manage the student recruitment process. Where they recruit via events, online or social media, they will be able to track monitor and engage with their potential students in they way the students want to be engaged with.
- **Student Admissions:** Student applications can be submitted online and all the relevant document uploaded, so the Admission Officer has all the information on a single record. They can then assess applications, automate acceptance and monitor student numbers.
- **A birds eye view of classes:** Course administrators will have access to the information that they need to manage daily classes. They will have class lists, student number per course, which faculty are teaching the courses and where and when lectures are taking place.
- **Supercharged Communication:** Utilising the plethora of communication channels and the intelligence of the solution users will be able to effectively and easily communicate with all Students, Potential Students, Faculty, donors, alumni and admiration staff.

Why Fusion: The Apps People

Fusion: The Apps People is a premier independent software vendor (ISV) that offers industry-specific applications. Our ever-growing portfolio includes applications that are designed and developed to extend Microsoft Business Applications or, in certain cases, as stand-alone applications to meet specific business requirements. These applications transform operations, empower employees and intelligently engage customers and are designed to meet the needs of customers, Microsoft Business Applications partners and industry experts.
