

An automated recharge management solution for recharging costs

Simplify recharge management across multiple hops

Recharge Manager is an Automated re-charge engine built on the Microsoft Dynamics 365 Finance and Operations platform to deliver the automatic re-charging across multiple legal entities and in as many steps as is required.

Recharge Manager from Fusion: The Apps People provides the ability to automatically share costs across multiple companies with predefined values and an upfront configuration for an unlimited number of scenarios, so the often laborious process of manually processing transactions is avoided.

Powered by **Dynamics 365 Finance and Supply Chain**

Automate and modernise global operations with an intuitive solution powered by Dynamics 365 Finance and Supply Chain from Microsoft. Monitor performance in real-time, predict future outcomes and make data-driven decisions to enable future growth.

About Recharge Manager

Recharge Manager is an automated re-charge engine built on the Microsoft Dynamics 365 Finance and Supply Chain platform to deliver the automatic re-charging across multiple legal entities and in as many steps as is required.

What we offer

Recharge Manager provides the ability to automatically share costs across multiple companies with predefined values and an upfront configuration for an unlimited number of scenarios, so the often laborious process of manually processing transactions is avoided

System uses multiple attributes to allow for a simple to complex matrix of allocations so that the costs can be distributed through a chain of companies with limited user input, raising the relevant intercompany dues and payables automatically..

Recharges can occur over multiple hops between companies and can terminate at either an internal company or invoiced to a 3rd party customer. Therefore dues and payables are raised and posted automatically to ensure that the position of each company is reflected correctly.

Utilizing the cost allocation process, allocations can be configured to auto assign, further simplifying user processes, where allocations can be performed over certain accounts and can be process across companies.

Recharge Manager Can Be Used For

- **Identify and Tag:** Users will capture transactions on the system as they do today, adding an allocation either automatically or manually.
- **Batch Process:** Periodically a batch process will pick up the transactions and Recharge them out to defined target entities in derived percentage allocations.
- **Intercompany Balanced:** Recharge sales invoices and purchase invoices are created in the respective companies.
- **Detailed Analysis:** Analyze in detail or in summary to verify expenses have all been Recharged.

Why Fusion: The Apps People

Fusion: The Apps People is a premier independent software vendor (ISV) that offers industry-specific applications. Our ever-growing portfolio includes applications that are designed and developed to extend Microsoft Business Applications or, in certain cases, as stand-alone applications to meet specific business requirements. These applications transform operations, empower employees and intelligently engage customers and are designed to meet the needs of customers, Microsoft Business Applications partners and industry experts.
