Why Dynamics 365?

Modern applications

Modern applications that deliver new experiences and connect with a businesses' existing systems to allow organizations to digitally transform their way. Applications that use mixed reality, the ability to take an application that overlays on the reality in front of the user, that guides them through a business process like never before. Connect to information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Intelligence that delivers

Intelligence that delivers actionable insight. Data in the new world includes social, relationship and productivity information in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated AI.

An extensible environment

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations, while introducing technologies that enable users to create solutions where no solution exists and to expand data analysis.
